

## Springtime...Ahhh..

Warmer weather is just around the corner.

Back to the smell of fresh cut grass and blossoms popping up on the trees. As for me, I could live in a perpetual spring time, with the fresh humid air, and the days getting longer. It brings a smile to my face. Now is a great time to get a jump start on a great looking yard. There's a lot that goes into having a outdoor home sanctuary so let us help you cross a few things off of your list.

## Aeration

Aeration is probably one of the most productive things you can do to aid in a healthy lawn. It helps break up compaction, provides better air flow, and

gives a direct route for any applied nutrition to get straight to the roots.

## Pre-emergent

Lawn weeds can be unsightly and some are even painful on bare feet. Grassy weeds in a lawn are the absolute worst. They are hard to kill once established and can leave bare patches when dug out or removed with a product application. Pre-emergents will help prevent crab-grass as well as other types of weeds.

## Sp..Sp..Spider!!!

Spring also means time for the migratory flight of spiders. Yes, I said spiders. Last fall millions of expectant mothers were busy building egg sacs and providing a safe place for their many children to come forth in the spring and set them loose on the world. Some species of the cute little creatures

actually spread by a process called ballooning. This means that they build small parachutes to catch the wind and sail through the sky to find

new living quarters. Our Perimeter Pest Plus application can help keep these unwanted pests out of your home.

## Nutrition

It was a fantastic winter for moisture. But your lawn is in desperate need of some food. Soil temperatures

are rising and the root systems will be in search of many nutrients including nitrogen, phosphorus and iron. We have our custom spring blend ready to help wake up your lawn and give it the head start that

will get it prepared to withstand the summer heat that is right around the corner.

We appreciate the opportunity you have given us to service your lawn. It is a task that we take very serious, in a hope that we will be able to continue this relationship for years to come.

*Thank you, so very much!*
